

# CREATE YOUR DREAM OUTDOOR LIVING SPACE

Outdoor living spaces are great for enjoying conversation, playing and dining together. Many families today are creating relaxing, stylish outdoor living spaces for quality time spent at home. Outdoor cooking and dining in the open-air inspires a cheerful and carefree atmosphere that cannot be attained indoors. The backyard patio is a peaceful place to spend time in warm weather months around the built-in outdoor kitchen and dining al fresco under the pergola, and in cold weather months lounging around in the outdoor "living room" with the stone fireplace, stone sitting area, and stone fire pit.

DTH Remodeling, your outdoor living contractor, will help you create your very own oasis that is both functional and grand. We will work outside of your home to create your dream outdoor living space, while you are safe inside during this time when so many are limited to working from and staying home. We pride ourselves on our workmanship and strive for absolute customer satisfaction on every job both big and small. Contact us now to learn more.
